## SuniRay2 Advanced Digital X-Ray Sensor

Power your veterinary practice with a complete dental imaging solution

SuniRay2 is the perfect digital dental imaging solution for your practice, giving you the power to:

- Easily capture high-quality digital x-rays fast, and have them ready to instantly display with digital software enhancements
- Make quicker, more efficient diagnoses with lightning-fast image acquisition
- Increase case acceptance by instantly displaying digital x-rays with preset image enhancements to your clients

## Excellent Image Quality

Making the diagnostic process faster and more efficient for you

- Suni CMOS chip, specially designed scintillator screen, and 1.2 mm fiber optic plate ensure a high-quality digital X-ray every time.
- Strikes the perfect balance between high line-pairs per millimeter, signal-to-noise ratio, and contrast exposure
- Vet Suni software's array of preset filters and automatic image enhancements complement SuniRay2's high-quality X-rays, helping you maximize your diagnostic capabilities.

## Enhanced Durability

Designed to withstand the daily stresses of a veterinary environment

- Unique reinforced cable attachment and ultrasonically sealed outer casing make for a reliable digital sensor that's built to last.
- Impact Protection Technology ensures exceptional sensor performance even when there's extra pressure or strain.

The Vet Suni software package is a comprehensive, easy-to-use, and feature-rich imaging program that easily integrates with your entire practice and allows streamlined access to a wide array of customization and image enhancement features. SuniRay2's already crisp and clear X-ray image quality is supplemented by the digital zoom, coloring, and archiving features, allowing image enhancements that highlight intraoral pathologies and help your clients gain a clearer understanding of proposed treatment plans. And with fully-customizable interface, toolbars, and toolboxes, Vet Suni makes organizing and managing files intuitive and hassle-free. Vet Suni provides the tools essential to your veterinary practice.

## Easy Integration

Open architecture allows easy integration with all leading practice management software.

## Accessibility
