Sunni Medical Imaging Enters Partnership with DentalSharing.Com

Sunni is the first company to offer new web-based sharing of digital x-rays

San Jose, September 19, 2011— Sunni Medical Imaging, Inc, a pioneer in the manufacture of digital radiography products for dental professionals, today announced an agreement with DentalSharing.com, Ridgewood, NJ, whereby Sunni will be the first digital x-ray company to offer new cloud based sharing of digital x-rays to its expanding base of digital customers in the U.S.

“For over 15 years now, Sunni has prided itself in bringing new and innovative technologies to the dental marketplace. Being able to easily and instantly share digital x-rays for consultation or referral services is yet another of those technologies,” states Paul Tucker, CEO of Sunni Medical Imaging.

The new DentalSharing feature set allows users to share all images and patient documents easily and instantly, and allows dental professionals to manage the patient information in a safe and secure HIPAA environment. No additional hardware or software is required to enable the new feature set and it will be directly integrated within Prof Sunni Imaging Software, the software that powers the SunniRay and Dr SunniPlus lines of digital x-ray sensors.

“We are very excited about putting together a business relationship with Sunni and look forward to a long and productive relationship.” said Tony Bonanno, CEO of Dental Sharing, LLC.

“DentalSharing has been searching for just the right partner to launch the new dental sharing service and we believe that Sunni has the reputation, the service, and the people that will make this venture most successful”

For launch, Sunni will offer this new service as a trial offer for 30 days at no charge. Customers can then easily upgrade their accounts for a nominal yearly fee.

About DentalSharing.com

DentalSharing.com, a New Jersey based company, has developed the only image sharing service integrated with an imaging system. This innovative, state of the art, web based service provides the dental community the ability to easily share and store digital dental X-rays and related information in full compliance with HIPAA regulations.

About Suni Medical Imaging

Suni Medical Imaging is the only Silicon Valley manufacturer of Digital Radiography Systems in the U.S. Headquartered in San Jose, CA; Suni manufactures and delivers high-quality digital radiography sensors under the Dr Suni Plus and SuniRay brands.
