

## **Suni Medical Imaging Launches the SuniPanQ Imaging System**

*Suni's latest line of digital imaging systems allows for complete panoramic images*

**SAN JOSE, Calif., - May 1, 2017** – Suni Medical Imaging today announced the immediate availability of its latest digital imaging system, Suni PanQ Panoramic Imaging System.

The PanQ utilizes a smart and compact design that allows for easy and fast setting installation. The overall build of the PanQ requires minimum space to operate and offers maximum accessibility for patients.

To ensure the highest quality of images taken by the Suni PanQ, it uses the advanced CMOS sensor to produce hi-resolution images while keeping radiation exposure to a minimum, to allow for maximum patient safety.

Equipped with a Multi-Focus function, the Suni PanQ gives operators an efficient workflow by overcoming patient mis-positioning and offering the user the ability to find the most optimally-focused choice from a selection of hi-res images. By supporting various exposure programs, Suni PanQ fulfills all diagnostic needs.

“We are very excited about the release of our latest line of digital imaging systems,” said Arya Azimi, Director of Marketing. “The Suni PanQ gives operators a complete look into clients’ needs while putting a top priority on patient safety.”

The Suni PanQ is also available with a Cephalometric option which includes a unique short ceph arm with a see-through column.

### **About Suni Medical Imaging**

Suni Medical Imaging has been designing and manufacturing digital sensors for over 20 years and is the only Silicon Valley manufacturer of Digital Radiography Systems in the U.S. Headquartered in San Jose, CA, Suni manufactures and delivers high-quality digital radiography sensors.
