**Sunni Medical Imaging Enters Partnership with Dentists Management Corporation**

***DMC to Sell Sunni Digital Imaging Products to Northwest Dentists***

San Jose, May 28, 2011— Sunni Medical Imaging, Inc, a pioneer in the manufacture of digital radiography products for dental professionals, today announced an agreement with Dentists Management Corporation (DMC), a subsidiary of The ODS Companies, Portland, OR, whereby DMC will sell and support Sunni Digital Imaging products to dental professionals throughout the Pacific Northwest.

“For over 50 years now, The ODS Companies has provided a wide range of medical, dental, pharmacy and vision insurance and related services to Northwest consumers. DMC focuses on supporting Northwest dentists by providing practice management software and related services for the digital practice and superior, high-touch customer service. “With its outstanding software, a very strong tradition of service and its reach into the Pacific Northwest area of the U.S., we are very proud to add Sunni’s portfolio of innovative digital products to DMC’s catalogue,” states Paul Tucker, CEO of Sunni Medical Imaging.

Among the products that DMC will represent are Sunni’s lines of intraoral sensors – Dr SunniPlus and SunniRay – as well as Sunni’s 3-in-1 extraoral imaging system popularly known as the Sunni3D, which provides superior quality panoramic, cephalometric and 3D cone beam imaging.

“We are very excited about putting together a business relationship with Sunni and look forward to a long and productive relationship.” said Dave Novitsky, National Sales Manager for DMC. “DMC has been looking to expand its digital offerings, specifically in the 3D Cone Beam arena, to better meet the expanding digital needs of the Northwest dental community. Sunni has the reputation, the service, and the products that will meet the needs of our Northwest market.”

### **About Dentists Management Corporation**

DMC has been a trailblazer in providing high quality dental practice management software since 1982. In addition to the Daisy Practice Management Software, DMC offers a suite of supporting services, like its automated redundant backup system to safeguard critical digital data.

Additionally, DMC provides a single source solution for the transition to a digital practice including space planning, computer hardware, digital training, etc. To find out more about DMC, go to our website ([www.dmcdental.com](http://www.dmcdental.com)) or contact Dave Novitsky at 503.765.3413,
