Suni Medical Imaging Introduces Suni ImageMaster Intraoral Camera

San Jose, Apr 4, 2015—Suni Medical Imaging has launched a new USB plug-and-play intraoral camera, the Suni ImageMaster. The newest addition to Suni’s robust lineup of innovative digital radiography products, the Suni ImageMaster continues Suni’s twenty-year commitment to providing practitioners with high-quality digital imaging tools to help maximize diagnostic capabilities and workflow efficiency.

Suni is partnering with Imagin Systems—who have been designing, engineering, and manufacturing state-of-the-art intraoral cameras since 1997—to deliver the Suni ImageMaster directly to practitioners. “Imagin Systems’ proven experience and expertise with imaging product technology made them a perfect fit for us when we started looking for someone to partner with to launch the next generation of Suni intraoral cameras,” said Arya Azimi, Director of Marketing at Suni Medical Imaging.

The Suni ImageMaster’s ergonomic design and accessible controls make for a user-friendly camera that handles easily and fits well in either hand. Its precision optics and combined Cosmetic and Diagnostic capabilities help in detecting caries, cracks, and fractures using a translucent light source. And its proprietary lighting system—using only two FFLEDs—generates a bright, color-correct light output that outperforms other cameras.

About Suni Medical Imaging

Suni Medical Imaging has been designing and manufacturing digital sensors for over 20 years and is the only Silicon Valley manufacturer of Digital Radiography Systems in the U.S. Headquartered in San Jose, CA, Suni manufactures and delivers high-quality digital radiography sensors under the SuniRay brand. For more information, call 1-800-GET-SUNI or visit www.suni.com/usa.

About Imagin Systems

Imagin Systems was founded in 1997 by intraoral camera designers, engineers and manufacturing professionals. Their award-winning, state-of-the-art intraoral cameras have

received the highest ratings from such organizations as the CRA. For more information, call 650-596-1001 or visit www.imaginsystems.com.
